### **Pan Global Live Investor Webinar Details**

**Date:** Wednesday, October 5th, 2022

**Time:** 9 a.m. PST / 12 p.m. EST

**Registration:** [Click here to register](#)

For those unable to participate, a recording of the webinar will be posted to the Company's web site following the live broadcast.

---

### **Company Update:**

Drilling is under way at the Hornitos and La Jarosa targets and multiple new targets have been identified for drill testing at Pan Global Resources Inc.'s 100-per-cent-owned Escacena project in the Iberian pyrite belt in southern Spain.

Tim Moody, president and chief executive officer of Pan Global, stated: "*Drilling has continued at Escacena with up to four drill rigs operating since January. The current plan includes testing at least six new targets in the Escacena project in addition to continuing to expand the copper and tin mineralization at La Romana. We are excited at the potential to make further copper discoveries, with drilling now initiated on several new targets, all within five kilometres of our near-surface La Romana copper-tin discovery. Ongoing exploration continues to generate multiple high-priority drill targets. Drilling is under way at the Hornitos and La Jarosa targets and is due to commence shortly at the Pilar, Zarcita and La Romana Deep targets. This is the first time most of the new targets will be drill tested. The fact that we are already seeing evidence of copper, lead and zinc mineralization in some of our first holes on new targets at Hornitos and La Jarosa is very encouraging, with assay results awaited. Assay results are also pending for 14 drill holes at the La Romana discovery.*"

Mr. Moody added, "*Pan Global is in a strong financial position and remains well funded to allow drilling to continue at an aggressive pace into 2023.*"

### Highlights include:

- New gravity survey data, soil geochemistry, heliborne electro-magnetic and IP data shows multiple coincident anomalies
- New conductor anomaly identified 400m down-dip from La Romana
- 11 targets prioritized for drilling and/or additional ground follow-up
- Drilling now focussed on new targets, including La Romana Deep, Zarcita, Hornitos, La Jarosa, El Pilar, El Pilar South, Cañada Honda and Bravo Norte
- Drilling in-progress at Hornitos and La Jarosa, and about to commence at the El Pilar, Zarcita and La Romana Deep targets
- First two drill holes at Hornitos have intersected 15-18m thick zones of "crackle" breccia-hosted sphalerite (zinc) and galena (lead) mineralization (assay results pending)

**ESCACENA PROJECT:** A large untested land package proximal to operating companies

\* There is no assurance that Pan Global Resources' results will be similar or mirror those of adjacent properties. |

**ESCACENA PROJECT: La Romana Deep Target** - Significant exploration upside at La Romana, down dip at the La Romana Deep Target and at the multiple other new and untested targets

### **About the Escacena Project**

The Escacena Project includes a large, plus 5,760-hectare land package controlled 100% by Pan Global in the east of the Iberian Pyrite Belt. The project is located near operating mines at Las Cruces (First Quantum), Rio Tinto (Atalaya Mining) and is immediately adjacent to the former Aznalcollar and Los Frailes mines where Grupo Mexico is in the permitting stage to restart mining. The Escacena Project hosts the La Romana copper-tin discovery and a number of other prospective targets, including La Jarosa, Hornitos, Zarcita, Pilar, Bravo and Barbacena.

### **About Pan Global Resources**

Pan Global Resources Inc. is actively engaged in base and precious metal exploration in southern Spain and is pursuing opportunities from exploration through to mine development. The Company is committed to operating safely and with respect to the communities and environment where we operate.
