1. NATURE OF OPERATIONS AND GOING CONCERN

The Company’s principal business activities are the acquisition of rights to explore for minerals and the exploration of acquired rights. The Company’s unproven mineral interests are located in the Republic of Serbia and Republic of Bosnia. The Company’s continuing operations and the ability of the Company to meet its mineral property commitments are dependent upon the ability of the Company to raise additional equity and debt financing and seeking joint venture partners.

The Company’s common shares are listed on the TSX Venture Exchange (“TSX-V”) under the trading symbol “PGZ”.

The Company’s principal office is located at:
700 – 1199 West Hastings Street
Vancouver, British Columbia
V6E 3T5

These financial statements are prepared on a going concern basis, which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future. The ability of the Company to continue as a going concern depends upon its ability to raise adequate financing and develop profitable operations. These financial statements do not include any adjustments to amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue operations. At October 31, 2014, the Company has not achieved profitable operations and has accumulated losses since inception. There is material uncertainty that may cast significant doubt upon the ability of the Company to continue as a going concern.

The mineral property interests are located in Serbia and all of the exploration expenditures are incurred in Serbia (Note 6).

11. FINANCIAL INSTRUMENTS, RISK AND CAPITAL MANAGEMENT

Financial Instruments

The Company classified its financial instruments as follows:

	Financial Instruments at FVTPL	Loans and Receivables	Other Financial Liabilities
As at October 31, 2014			
Cash and cash equivalents	\$ 58,176	\$ -	\$ -

Accounts payable and accrued liabilities	-	-	530,107
	\$ 58,176	\$ 33,003	\$ 530,107

12. FINANCIAL INSTRUMENTS, RISK AND CAPITAL MANAGEMENT (cont'd...)

Fair Value

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- a) Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 - Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 - Inputs for assets and liabilities that are not based on observable market data.

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value.

The carrying value of receivables, advances, and accounts payable and accrued liabilities approximated their fair value because of the short-term nature of these instruments.

As at October 31, 2014, the Company's financial instruments measured at fair value are as follows:

Financial Assets	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 58,176	\$ -	\$ -	\$ 58,176

Risk and Capital Management

The Company's capital includes share capital and the cumulative deficit. The Company's objectives when managing capital are to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. The Company may issue new shares in order to meet its financial obligations.

The Company's activities expose it to a variety of financial risks, market risk (including currency risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Company.

This note presents information about the Company's exposure to each of these risks, the Company's objectives and processes for measuring and managing risk, and the Company's management of capital.

The board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

12. FINANCIAL INSTRUMENTS, RISK AND CAPITAL MANAGEMENT (cont'd...)

Credit Risk

Credit risk arises from cash and deposits with banks, as well as credit exposure to customers, including outstanding receivables and committed transactions. There is no significant concentration of credit risk. The Company's cash deposits are primarily held with a Canadian chartered bank. The Company has minimal accounts receivable exposure as it relates to amounts due from the Government of Canada pursuant to sales tax credits.

Interest rate risk

As the Company does not have significant interest-bearing assets, the Company's income and operating cash flows are not significantly affected by changes in market interest rates.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company has historically relied on issuance of shares and warrants to fund exploration programs and may require doing so again in the future.

Currency Risk

The Company has identified its functional currency as the Canadian dollar. Certain of the Company's exploration expenditures are denominated in Serbian Dinar (RSD) and United States dollars (USD). The Company's exposure to foreign currency risk arises primarily on fluctuations between the Canadian dollar and those two currencies. The Company has not entered into any derivative instruments to manage foreign exchange fluctuations. Management believes the foreign exchange risk related to currency conversions are minimal.

12. EVENTS AFTER REPORTING DATE

Subsequent October 31, 2014, 164,850 share purchase warrants at \$0.40 expired unexercised and 2,747,500 share purchase warrants at \$0.60 expired unexercised.
